PROFIL

I am currently pursuing the Data-AI Master program at Institut Polytechnique de Paris. As a Machine Learning Intern at Climaviation, I develop AI models to correct atmospheric measurements. I thrive in international environments and excel in teamwork.

EDUCATION

INSTITUT POLYTECHNIQUE DE PARIS, 2024 - Current
Master of Data-AI, M2 (international).

UNIVERSITÉ PARIS-CITÉ, 2021 - 2024
Bachelor of Computer Science (with honors).

SAN DIEGO STATE UNIVERSITY, 2023 - 2024
Exchange program: Bachelor of Computer Science.

THE AMERICAN BUSINESS SCHOOL OF PARIS, 2022
Summer Classes: International Business.

PROFESSIONAL EXPERIENCE

Climaviation (IPSL Research Lab), April - July 2025
Machine Learning Intern:

- Design and train AI models to correct atmospheric measurement biases, improving the accuracy of environmental data.
- Focus on predicting Ice Super-Saturated Regions (ISSRs) to enable contrail avoidance strategies in aviation.

ISA by WorldStrides, 2022 - 2024
Student services / IT support:

- Actively guided students through the complexities of the study abroad process, from application to cultural integration and academic support.
- Contributed to team meetings and planning travel logistics, cultural norms, safety protocols.

PROJECTS

Machine learning Kaggle competition, Spring 2023

- Created a machine learning model to predict a binary output based on incomplete data.
- Used Python to manipulate scikit-learn libraries and visualization tools.

Machine Learning in Stochastic Resonance, Fall 2023

- Filtering brain signals using machine learning methods.
- Isolating pikes in a raw signal with the best accuracy considering noise.

LANGUAGES

French - Native | Hungarian - Native | English - Fluent | German - B1 certification | Spanish - Intermediate

IT-SKILLS

Programming languages: Python | JAVA | JS | C++ | HTML/CSS | MATLAB | SQL | Prolog | Haskell
Developer Tools: Scikit-Learn | Pandas | NumPy | PyTorch | Seaborn | D3.js | Docker | Github

INTERESTS

Sports | Languages and foreign cultures | Artificial Intelligence | Automotive and aeronautical industry
